

Rhapsody Professional Modules

REN-200: Welcome to Rhapsody Professional Certification

Concepts introduced:

1. Course Learning Objectives
2. The Training Environment
3. Resources

This module sets out the course guidelines, explains the learning objectives and the training environment. Links to downloading the Rhapsody **Engine** and the **IDE** executable files are available if required.

REN-201: Introduction and Overview

Key concepts:

1. Overview of the Rhapsody Associate Course
2. Refresher Quiz

The overview of the **Rhapsody Associate** course and the refresher quiz are intended to ensure that anyone starting the **Professional** course is thoroughly familiar with the topics covered at the earlier level. This is particularly important if a significant period of time has elapsed between the two courses. In such a case, it is recommended that the relevant topics in the Associate course are revisited before proceeding with the Professional course.

REN-202: The Rhapsody Interface

Key concepts:

1. Rhapsody - an overview of communications
2. Message Flow and Sequencing
3. Best Practices

REN-203: Messaging

Key concepts:

1. The Message Object

- Character encoding
 - Message Properties
 - Message Body
2. The message structure (implicit and explicit).
 3. Manipulating a message (content and structure).
 - The Mapper filter
 - The JavaScript filter
 - The Message Modifier filter
 - The Intelligent Mapper filter

REN-204: Rhapsody Services

Key concepts:

1. Certificate management
2. Lookup tables

REN-205: Communicating with Rhapsody

Key concepts:

1. Different ways in which information can be sent into and received from a Rhapsody route:
 - Network based communication:
 - TCP/IP Client and Server
 - E-mail Client
 - Amazon Web Services
 - File based communication:
 - Directory
 - FTP & SSH File Transfer Protocol
 - Other methods

REN-206: Working with Databases

Key concepts:

1. Database Communication Points:
 - Configuration Editor
 - Database communication point
 - Database Insertion communication point
2. Database Filters

REN-207: Working with Web Services

Key concepts:

1. REST web services
 - HTTP Client and Server
 - JavaScript REST Client
2. SOAP web services
 - Web Service Client and Hosting

REN-208: Applying Business Logic

Key concepts:

1. Common Filters
2. Utility Filters
3. HL7 Filters
4. RPG Filters
5. XML Filters
